

PX 3

PARAT® X-treme

PROFESSIONAL LIGHTING

PX 3

› One rod-shaped model (size 2 AA)

› One material: sturdy polycarbonate for all applications

white LED

› One lamp with incredible illumination power and no restriction of brightness by ATEX requirements

The PX 3 flashlight is designed just as thoroughly and safely as all PARAT safety lights, using the latest technology, but is deliberately supplied without ATEX certification as the ATEX temperature classes have the disadvantage of limiting the brightness of a light.

The PX 3, waterproof down to a depth of 20 m, shows that a light can be even brighter.

At 30 Lumens, the flashlight features extremely bright illumination at a range of up to 50 m, although it only uses two alkaline AA/Mignon/LR6 batteries with 1.5 V each. The profile of the flashlight is rounded off by uninterrupted illumination times from 15 h (at full brightness) to 50 h*.

The high-quality materials used and the latest production technology ensure that PX 3 users will not be left in the dark, whether in the open air, under water or under extreme conditions.

Other features such as the shaped, hard switch which can easily be operated when wearing gloves and the convenient clip holder with recess for attachment to clothes, key ring or wrist strap have been consistently implemented on the PX 3. There is also sufficient space to print a special text.

A belt bag is available as an option.

COMPACT.
STURDY.
SAFE.

* 15 h = full brightness with 2 x AA alkaline batteries.
50 h = reduced brightness depending on battery consumption.

PROFESSIONAL LIGHTING

SPECIALS**

- Modular design
- O-ring seal
- Hermetically sealed switch to prevent water, dust, etc. from entering the unit
- Protection against short circuits and incorrectly inserted batteries
- Use of the latest SMD technology
- High luminous intensity for effective illumination
- 100 % waterproof and dust-proof
